

Instructions for pH Papers

1. Hold pH paper test strip at end (large white area) and immerse 1-3 seconds in solution to be tested.
2. Compare resultant color of indicator bar (widest, unmarked bar in the center) to the reference control bars (above and below indicator) and choose the one that is the closest match.
3. If none of the control colors match the indicator, the pH of the tested solution is out of the range of these papers.
